

CPCF Checklist

Wednesday 30th October 2019

PSNC is working to provide as much information and as many resources as possible to help community pharmacy teams to understand the details of the new Community Pharmacy Contractual Framework (CPCF) agreement as they are finalised in the ongoing negotiations.

This email is one of a series of recommended actions for community pharmacy contractors to help you to get ready for the introduction of all elements of the five-year CPCF. There is a lot to do and details will be coming out in stages, so this email series will help guide you through the process and highlight all of the resources and support available to you.

24. PQS: Start working towards meeting the risk review quality criterion

Community pharmacy contractors may now want to consider when they will start working towards meeting the risk review quality criterion, if they have not already started this, as a new resource to support contractors has now been published.

PSNC has worked with the Community Pharmacy Patient Safety Group to produce the resource, Pharmacy Quality Scheme – completing the risk review, which provides contractors with information on what they need to do to meet the quality criterion as well as worked examples of the risk review templates.

Further information on this quality criterion is available in the NHS England and NHS Improvement (NHSE&I) Pharmacy Quality Scheme (PQS) **guidance** (pages 24-25) and risk review templates, which contractors can choose to use, are also available in Annex 2 and 3 in this guidance. PSNC has made available standalone versions of these risk review templates.

Pharmacy professionals are advised, if they have not already done so, to complete the Centre for Pharmacy Postgraduate Education (CPPE) Risk management **training and e-assessment** before completing the risk reviews (many pharmacy professionals will have completed this last year as part of the Risk management quality criterion of the 2018/19 Quality Payments Scheme; there is not a PQS requirement to complete this again). Pharmacy professionals should also complete the CPPE Sepsis **online training and assessment** prior to completing the risk review on sepsis, to inform the content of the risk review (the CPPE Risk management and Sepsis training and e-assessments are both quality criteria of the PQS).

Further information on how to meet this quality criterion can be found at: psnc.org.uk/pqsriskreview

Digital CPCF Roadshow on-demand

A recording of PSNC's recent digital roadshow on the five-year Community Pharmacy Contractual Framework (CPCF) is now available to view. The roadshow explores what the future holds for pharmacy and should help contractors and their teams to start to prepare themselves for that. Watch it now: psnc.org.uk/digitalroadshow

Previous editions of this email series can be found in our CPCF hub: psnc.org.uk/5yearCPCF
