## Patient's Medicines Green Bag

To help you carry **your** medicines into **your** care facilities

Please ensure you take all your medicines with you, including medicines you buy yourself, whenever you are going into a healthcare environment.

This...

- helps healthcare staff record accurate information on all your medicines;
- allows you to keep your own medicines with you;
- helps avoid delays in administration and discharge; as your own medicines stay with you;
- provides a bag for keeping medicines related information, for example repeat prescription.
