

Paediatric antimicrobial prescribing in primary care

An online webinar to promote the appropriate prescribing of antimicrobials in children

Date – Thursday
12th September
Time - 1-2pm
Via Teams

Are you a GP, nurse, pharmacy professional, or other healthcare professional looking to improve your knowledge on paediatric antimicrobial prescribing?

If yes, then join us for this webinar as we seek to explain the rational use of antibiotics to improve the overall quality of paediatric care.

[Register here for the webinar](#)

Did you know;

- ***Inappropriate antimicrobial prescribing in children increases the risk of AMR and can disrupt the microbiome in young children.***
- ***There are several resources to support paediatric AMS activities.***
- ***Many interventions such a communication resources and delayed prescriptions can be used to reduce antibiotic use without an associated increase in complications.***
