

Stop searching through paper information and quickly signpost your patients to the most appropriate care and support services.

What is NHS Service Finder?

An online directory that allows healthcare professionals to search for health and social care organisations based on location or relevance - The directory contains referral and contact information, as well as access information including maps and opening hours.

The information is kept continuously up-to-date by taking information from the Directory of Services. It removes the reliance on old, outdated directories, and individual local knowledge in your organisation.

Services Available

NHS Service Finder has information available for a wide range of services and divisions such as; Primary Care, Pharmacy, Acute Services, Community Physical Health and Mental Health. We have also been expanding the directory to voluntary services, local services and charities. Below are just a few of the services we have recently added.

Isorropia

A local mental health wellbeing service available to anyone over the age of 16 living on the Isle of Wight.

Domestic Abuse Alliance

Provides civil legal assistance and protection for people living with domestic abuse.

Paragon

Support adults and children who are currently experiencing or have recently experienced domestic abuse; Providing practical and emotional support to reduce the risk of harm.

2Wish Bereavement Charity

Offer immediate support after the sudden and unexpected death of a child or young person aged 25 and under.

NHS Service Finder Update

NHS England's Service Finder now uses multi-factor authentication (MFA).

To access or log in to Service Finder with Care Identity, select 'Log in with my Care Identity' from the home page.
