

# Think Pharmacy First

Share your experience of using your local pharmacy.

The new ten year plan for the NHS calls for us to shift care closer to home and to place a greater focus on prevention. In Hampshire and the Isle of Wight, local community pharmacy is already playing an important role in helping to deliver these two shifts.

Take our survey here:

Local pharmacies are a source of expert advice and treatment for a range of minor illnesses, from coughs and colds to insect bites and minor skin issues. They offer prescription medication for seven common conditions, without the need to see a GP.

We are looking to understand how people currently use their pharmacy for minor illness and their awareness of the range of advice and treatment available.

The survey takes only a few minutes online and you'll be helping us to improve pharmacy services for all.
