

Antimicrobial Resistance Latest Pharmacy Online Course

To support the September Public Health Campaign

Antimicrobial resistance (AMR) is a huge **threat** to our existence.

Do you know that in 30 years, **10 million people a year** could die due to AMR?

In Italy and Greece it is already **unsafe** to do certain complex operations, give chemotherapy and do transplants.

Our training explains why AMR is such threat and will support you to deliver the **mandatory public health campaign** in September to raise public awareness.
