

**Struggling to track all the training your
team have undertaken?
Use the VirtualOutcomes free course
tracker**

Continuing Professional Development

foundation reading
cultivation critique sharing education
guidance coaching symposium questioning discussing instruction readying
shadowing testing grounding learning principles thinking
applying exercises theory

The **General Pharmaceutical Council** require all members of the pharmacy team to undertake training. To demonstrate this activity, the GPhC will require evidence.

One simple way to provide evidence is to get all the staff to complete the **FREE** training checklist available from VirtualOutcomes. This checklist allows you to fill in the courses completed against the name of the team member.

This provides a simple and effective way to track CPD in your pharmacy.
