

NEW Training Modules to Support Pharmacy Professionals with their GPhC Revalidation plus additional pharmacy team training

Inflammatory Bowel Disease

Two modules to support you in learning about **Inflammatory Bowel Disease (IBD)**, a commonly mis-diagnosed condition so a great example of an area to use for your **reflective account**.

Each clinical module is just over **20 minutes** and covers how to recognise the **signs and symptoms**, as well as what advice you can give your patients

To **help support** you we have also produced a foundation module on IBD which the **whole pharmacy** team can watch

The pharmacy team module covers the basics of **IBD** and how they can best **identify** and **support** patients
