

## PADDINGToN - Parent co-Designed Drug Information for parents and Guardians Taking Neonates home

**Are you a healthcare professional working in primary care? Have you experience working with parents/carers of babies discharged from hospital on medicines?**

We would like to ask you some questions about your view on medication problems encountered by parents/carers during the transition between hospital and home and ask you to identify any existing available resources used to support this process. This will be in the form of an electronic survey which should take **about 10 minutes** to complete.

There is a chance to win a £25 'Love2Shop' voucher as a thank you for your time.

**For more information please contact:**
