

Inflammatory Bowel Disease (IBD)

Courses to support NHS CPCS

Inflammatory Bowel Disease is commonly misdiagnosed and patients may be referred through CPCS with **common symptoms** that may actually be IBD.

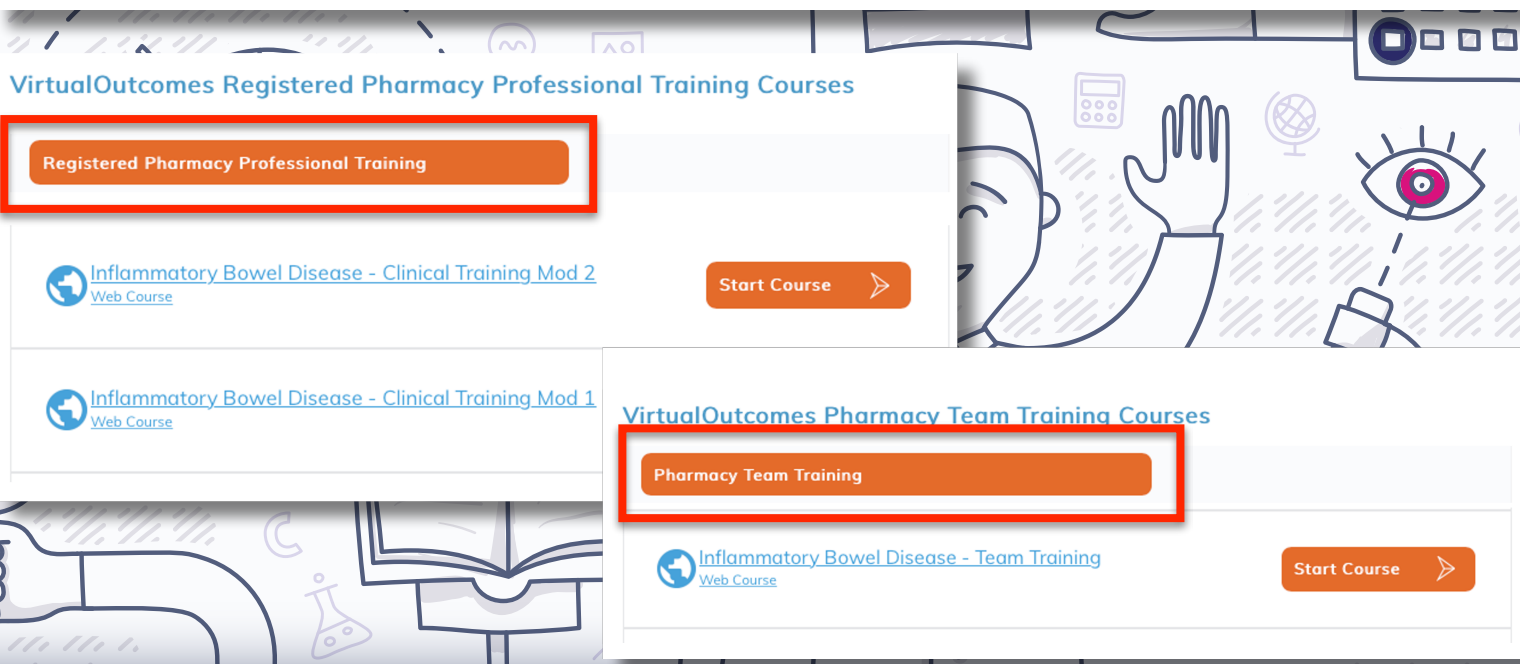

Would you know you to **recognise** it is IBD? We have two **clinical** modules (20 mins long) that support Pharmacists in learning about **Inflammatory Bowel Disease**.

The modules cover how to recognise the **signs and symptoms**, as well as what advice you can give your patients.

There is also a pharmacy team module which covers the basics of **IBD** and how to **identify** and **support** patients
