Polypharmacy:
getting the balance right

**The mechanics of
tackling overprescribing
and problematic
polypharmacy**

Problematic polypharmacy is a current and growing issue and Pharmacists in the future will have an increasing role in helping to address it.

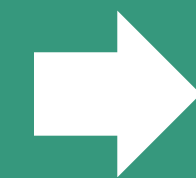

Structured Medication Reviews are the bedrock of addressing problematic polypharmacy.

If you are a pharmacist working in General Practice and want to learn more about how to fulfil your role in structured medication reviews and provide better care to older people with multi morbidity, join us for this interactive training programme.

Aimed at pharmacists who are near to completing or have recently completed their CPPE Pathway or new to prescribing.

**Tue 3 February
&
Tue 3 March,
09:30-12:00
(Delegates must
attend both sessions)**
