

### Teaching & Assessment

You will study a combination of required and optional modules, for details visit [www.kcl.ac.uk/lsmplt](http://www.kcl.ac.uk/lsmplt).

We use a variety of teaching methods including tutorials, workshops, presentations and case studies. The small class size allows for interactive learning and group discussion, and some of your materials will be on our online service.

We employ a variety of assessment methods, and some of the examples include written reflective accounts of cases or patient interventions, written critical reflection of a risk framework, design of an adherence strategy, oral presentation of a consultation framework or a case study, written report of a business proposal, and Observed Structured Clinical Examinations (OSCEs).

#### Voice of the **student**

*'I found that this programme had a good mix of learning styles, including hospital visits and talking to patients from expert patient groups, which really helped to improve my communication skills.'*

**Dina Makhecha**

A part-time, modular postgraduate course for qualified pharmacists working in community, primary care, or general practice, who wish to develop excellent clinical knowledge and consultation skills. This programme of study can incorporate pharmacist independent prescribing.

# 16th

**RANKED 16TH IN THE WORLD FOR CLINICAL, PRE-CLINICAL AND HEALTH (TIMES HIGHER EDUCATION WORLD UNIVERSITY RANKINGS 2016-17)**

# 7th

**RANKED 7TH IN THE WORLD FOR PHARMACY AND PHARMACOLOGY (QS WORLD UNIVERSITY RANKINGS 2017)**

#### Course Detail

Pharmacists play an important and expanding role in optimising the use of medicines and in supporting public health. This programme will enhance your practice by enabling you to apply clinical knowledge in the pharmacy setting and to deliver more effective consultation leading to higher levels of patient adherence.

This specialist programme consists of short modules that you can take on their own or together to gain a post-graduate qualification such as a Certificate, Diploma or MSc. The course is flexible, so you can tailor it to meet your specific professional interests or service needs.

#### Key Benefits

- Clinical experts and experienced academic staff lead our teaching, and combine university-based study days with work-based learning.
- Course content and assessments will

reflect the most up-to-date practices which will support service development in your workplace.

- We are part of King's Heath Partners Academic Health Sciences Centre (AHSC), a pioneering collaboration between us, Guy's, St Thomas' and King's College Hospitals and South London and Maudsley NHS Foundation Trusts.
- Opportunity to gain a Practice Certificate in Independent Prescribing, accredited by the GPhC, either alone or as part of the PG Dip or MSc.

#### Career Prospects

On completion of this programme pharmacists will be equipped to deliver pharmacy services in the community to a high standard, in line with the demands of the changing NHS. Students may also be able to move into the provision of pharmaceutical and prescribing advice in primary care.
